

Crown There are old (8 digits) and new (10 digits) coding systems.

<OLD> (8 digits)

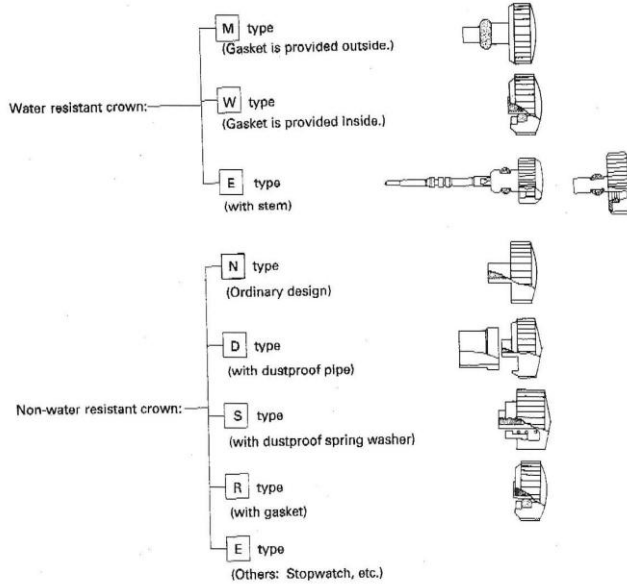

Ex. **3 5 R 0 1 N A 1**

Size code: Two numerical digits to show the outside diameter of the crown.

- 18 -

Type code: One letter to designate the crown function.

Serial No. code : A number from 01 to 99 is assigned to differentiate the appearance.

Finish code : Expressed in one letter to designate the surface finish of the crown.

Ex. N : Ordinary finish
D : Diamond-cut finish
E : Others

Color tone code : One letter to show the material and the kind of surface plating.

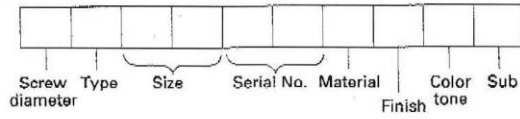

Ex. A, B, D, F, N: SGP J : FDP (palladium plating)
C : CRP (Chromium plating) M : 14KWG (14-carat white gold)
E : 18K (18-carat yellow gold) S : SS (Stainless steel)
X : 18K (18-carat white gold) Z : 14K (14-carat yellow gold)

Assortment code: One numerical digit or letter to show the type of marking on the crown.

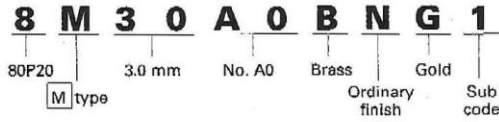

Ex. 1: without mark  4-9: Others
2-3: with mark  A-E: with Jewel

- 19 -

<NEW> (10 digits)

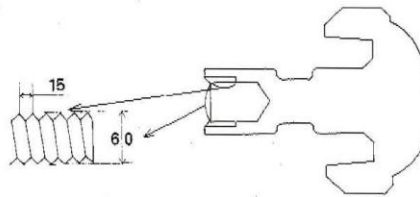

Ex.

Screw diameter code : A numeral to identify the type of screw that fits the winding stem.

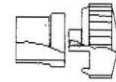

- 1 : No screw
- 6 : 60P15
- 8 : 80P20
- 9 : 90P22.5

Ex.)
60P15
(1/100 mm)

Type code : A letter excluding I, O, Q and U to classify the type of crown.

A type : Dustproof (without gasket)

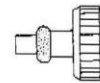

E type : Screw lock type with winding stem (High-pressure water resistant)

K type : With a fixing ring (High-pressure water resistant)

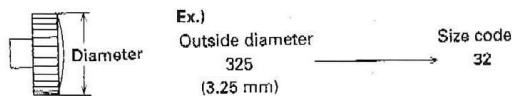

M type : Gasket makes contact with the inside of the winding stem pipe (Water resistant, Non-water resistant)

Z type : Others

Size code : The first two figures of the outside diameter of a crown.

Serial No. code : Consisting of two digits; a letter excluding I, O, Q and U for the first digit and a numeral for the second digit.

Material code : A letter excluding I, O, Q and U to denote the material of the crown head.

- B : Brass
- K : 18K (* Color of gold is classified by the color tone code.)
- M : 14K (* Color of gold is classified by the color tone code.)
- N : Ns (Nickel silver)
- P : Plastic
- S : Stainless steel
- T : Titan
- Z : Others

Finish code : A letter excluding I, O, Q and U to denote the finish of the roulette and head of the crown.

Color tone code : A letter excluding I, O, Q and U to denote the color tone of the crown head.

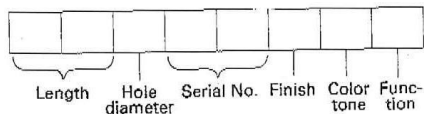

Sub code : Consisting of a numeral and a letter excluding I, O, Q and U that denote the difference in color tone, material and color tone of jewel and marking. The numeral is assigned in the order in which the code is established.

Hands There are old (8 digits) and new (11 digits) coding systems

<OLD> (8 digits)

The parts number for the second hand is different in coding system from those for the hour and minute hands.

(a) Hour and minute hands

Ex. **1 0 C 4 6 A G H**

(b) Second hand

Ex. **1 3 S C 1 7 A S**

Function code: H : Hour hand
 M : Minute hand
 S : Second hand
